

# Intelligence Broadcast Receivers

## DESCRIPTION

The Joint Tactical Terminal (JTT) and the Embedded National Tactical Receiver (ENTR) are part of the Intelligence Broadcast Receiver (IBR) Family, which receives and processes national- and theater-level, near-real-time intelligence information simultaneously from several sources. These include the Intelligence Broadcast Service (IBS) Simplex (Legacy-TDDS), IBS Interactive (Legacy-TIBS), IBS Line of Sight (Legacy-TRIXS), and Tactical Data Information Exchange Service B (TADIXS B) systems.

## OPERATIONAL IMPACT

The JTT capability is directly tied to the Congressionally mandated IBS initiative that will combine the current four legacy intelligence broadcasts into a single broadcast. The IBR Family of Receivers is the sole source that will provide interface to the new IBS broadcast information. When IBS is implemented, legacy terminal systems will not be able to receive IBS data. Access to intelligence information will not be possible without the JTT and ENTR, and other IBR solutions

## PROGRAM STATUS

Approved Acquisition Objective is 235 IBR systems (25 JTTs and 210 ENTRs). JTT procurement of 25 systems is complete. JTT fielding began in fourth quarter

FY 2004. Procurement of 210 ENTRs will be fulfilled during FY 2006-2010. Developmental testing for ENTR began during third quarter FY 2004.

Procurement Profile:	FY 06	FY 07
Quantity (ENTR):	26	04
Developer/Manufacturer: JTT: Raytheon C3S		
Radios/Terminals, St. Petersburg, FL; ENTR: L3		
Communications, Conic Division, San Diego, CA
